

SECTION 1: STRATEGIC POSITIONING REFINEMENT (DEEP EXECUTION)

1.1 🔍 Current Positioning (Reality Check)

Right now Cognent communicates:

“Engineering-first AI + software studio building production-ready systems”

Problem:

This is **technically strong but commercially weak**

Why?

Issue

Impact

Too technical Founders don’t fully understand

No business outcome Hard to justify cost

“Studio” is vague Confusion vs agency

1.2 🎯 Positioning Goal

You need positioning that does **3 things simultaneously**:

1. **Signals technical depth** (for CTOs)
 2. **Explains business value** (for founders)
 3. **Justifies premium pricing**
-

1.3 🔥 Final Positioning Framework (Use This Everywhere)

☒ **MASTER POSITIONING LINE**

“We design and build scalable systems that don’t break when your business grows.”

☒ **SUPPORTING LINE (FOR WEBSITE)**

“From architecture to AI — we help you avoid rebuilding your product at scale.”

☒ **SHORT VERSION (DM / SOCIAL)**

“We fix and build systems that are ready for scale.”

1.4 🧩 Dual Messaging System (Critical)

You are selling to **two brains**:

CTO / TECH AUDIENCE

They care about:

- Architecture
- Performance
- Reliability

Messaging:

“We design clean, scalable architectures and production-ready AI systems that hold under real load.”

FOUNDER / NON-TECH

They care about:

- Growth
- Cost
- Risk

Messaging:

“We help you avoid expensive rebuilds when your product starts growing.”

⚠️ Rule:

👉 Every message should pass **both filters**

1.5 💰 ROI-DRIVEN POSITIONING (THIS IS GAME CHANGER)

Right now you say:

✗ “We build scalable systems”

You should say:

☑️ “We reduce the risk of system failure, downtime, and costly rebuilds.”

Convert Features → Business Outcomes

Feature	Convert to
Scalable architecture	Avoid rebuilding later
Performance optimization	Faster product = more users retained
AI integration	Automate operations / reduce cost

🔥 Example Transformation

✗ “We build AI systems”

☑️ “We help you automate operations and reduce manual workload using AI”

1.6 🧱 SERVICE → PRODUCT TRANSFORMATION

Right now:

👉 You sell **services**

You need to sell:

👉 **Structured products**

◆ 1. Entry Product (Lead Generator)

Name:

“Scale Readiness Audit”

Offer:

- 30–45 min review
- System analysis
- Risk report

Output:

- PDF / Notion doc

Price:
₹2,999–₹4,999 (or free initially)

◆ **2. Core Product**

Name:
“System Build / Optimization”

- Includes:**
- Architecture
 - Development
 - Performance tuning

Price:
₹50K–₹2L+

◆ **3. Premium Product**

Name:
“Engineering Partnership”

- Includes:**
- Ongoing system design
 - AI integration
 - Scaling support

Price:
₹2L–₹10L+

1.7 🧠 POSITIONING MATRIX (IMPORTANT)

Level	Message
Tagline	Systems that scale
Website	Build systems that don’t break
Sales	Avoid costly rebuilds
Technical	Clean architecture + AI

1.8 ✖ WHAT TO REMOVE IMMEDIATELY

- “We build websites/apps”
 - “We provide development services”
 - “We are a software company”
- These kill your premium positioning.
-

1.9 🔥 HIGH-CONVERSION POSITIONING STACK

Use this structure everywhere:

1. Problem

“Most products fail before scale.”

2. Insight

“Not because of features — but because of early engineering decisions.”

3. Solution

“We design systems that survive growth.”

4. Outcome

“So you don’t have to rebuild later.”

1.10 🧪 VALIDATION TEST (VERY IMPORTANT)

Before using any message, test:

Ask:

- Would a founder understand this in 3 seconds?
- Does this show business value?
- Does this justify high pricing?

If not → rewrite.

1.11 ⚡ IMMEDIATE ACTIONS (DO TODAY)

Step 1:

Update LinkedIn headline:

“We build systems that don’t break at scale | AI + Architecture”

Step 2:

Update website hero:

“Build software that survives growth.”

Step 3:

Create offer:

👉 “Scale Readiness Audit”

Step 4:

Rewrite your pitch:

- No technical jargon first
 - Start with business pain
-

🔥 FINAL TRUTH

You don’t have a positioning problem.

👉 You have a **translation problem**:

- From engineering → business value
 - From complexity → clarity
-

2.1 CURRENT STATE (REALITY)

From your setup:

- Website on **Vercel subdomain**
 - Good tech stack (Next.js, FastAPI)
 - No strong **infra positioning**
 - No **enterprise-grade perception**
-

** Problem**

Issue	Impact
Vercel subdomain	Looks temporary
No cloud narrative	No scalability signal
No infra page	CTO trust ↓
No system architecture proof	Authority ↓

2.2 GOAL OF THIS SECTION

You need to:

-  Look like a **serious engineering company**
 -  Not a student project / early freelancer
-

2.3 DOMAIN STRATEGY (HIGH PRIORITY)

◆ Step 1: Buy Custom Domain (DO THIS TODAY)

Recommended:

- cognent.tech ☒ (best)
 - cognentlabs.com
 - getcognent.com
-

◆ Why It Matters

Factor	Impact
Trust	↑ instantly
SEO	Indexing starts
Branding	Premium perception
Outreach	More replies

◆ Execution

- Buy from: GoDaddy / Namecheap
 - Connect to Vercel (takes 10 min)
 - Enable HTTPS
-

** Rule:**

👉 No serious client trusts a .vercel.app domain

2.4 ⚙️ TECH STACK POSITIONING (IMPORTANT)

You are already using strong tech.

But:

👉 You are **not communicating it properly**

◆ Current Stack (Strong)

- Frontend: Next.js
 - Backend: FastAPI
 - DB: PostgreSQL
 - Hosting: Vercel
-

🔥 **Upgrade = NOT changing stack**

👉 It's **presenting it strategically**

◆ Add THIS to website:

“Built on modern, scalable architecture using Next.js, FastAPI, and cloud-native infrastructure.”

◆ Why:

- CTO trust ↑
 - Technical authority ↑
 - Premium positioning ↑
-

2.5 ☁️ CLOUD INFRASTRUCTURE STRATEGY

◆ What You Need

Even if you're not fully using it yet:

👉 You must **position around cloud scalability**

◆ Recommended Setup

Frontend:

- Vercel (keep)

Backend:

- AWS / GCP

Database:

- PostgreSQL (RDS / Supabase)

AI Layer:

- OpenAI / Anthropic APIs
 - Vector DB (Pinecone / Weaviate)
-

🔥 **Positioning Line**

“We build systems designed for cloud-scale from day one.”

◆ Why This Matters

Clients don't buy code.

They buy:

👉 “Will this system survive growth?”

2.6 🧱 WEBSITE ARCHITECTURE (CONVERSION SYSTEM)

🚨 Current Problem

Your website is:

- Informational
 - Not a conversion machine
-

🎯 New Structure (MANDATORY)

◆ 1. HERO (First screen)

“Build software that doesn't break when you scale.”

CTA:

👉 “Get architecture review”

◆ 2. PROBLEM SECTION

“Most products fail before scale...”

◆ 3. SOLUTION

Explain:

- Architecture-first
 - Performance
 - AI readiness
-

◆ 4. PROOF

Even if no clients:

- Case simulations
 - System breakdowns
-

◆ 5. SERVICES (Productized)

- Audit
 - Build
 - Partnership
-

◆ 6. CTA

👉 “Book your audit”

2.7 🎯 LANDING PAGE SYSTEM (CRITICAL)

You need **dedicated conversion pages**

◆ Page 1: Audit Page

URL:
/architecture-audit
Content:

- Problem
- What you get
- CTA

◆ **Page 2: AI Integration**

URL:
/ai-systems

◆ **Page 3: Scaling Systems**

URL:
/scalable-architecture

Why:

Each page =

targeted conversion funnel

2.8 **SEO FOUNDATION (BASIC BUT IMPORTANT)**

◆ **Add:**

- Title tags
 - Meta descriptions
 - H1 structure
-

◆ **Target Keywords:**

- “scalable system development”
 - “AI integration services”
 - “software architecture consulting”
-

◆ **Tools:**

- Google Search Console
 - Ahrefs / Ubersuggest
-

2.9 **TRUST SIGNAL INFRASTRUCTURE**

Add:

- Professional email:
 hello@cognent.tech
 - Privacy policy
 - Terms page
 - About page
-

Why:

Makes you look real company, not freelancer

2.10 ⚡ INFRASTRUCTURE PRIORITY STACK

🔴 DO IMMEDIATELY (Day 1–2)

1. Buy domain
 2. Connect to Vercel
 3. Setup professional email
-

🟠 NEXT (Day 3–5)

4. Update homepage
 5. Create audit landing page
 6. Add tech stack section
-

🟡 NEXT (Week 2)

7. Add blog
 8. Setup SEO
 9. Add cloud positioning
-

🔥 FINAL TRUTH

Right now:

👉 You have **strong engineering**

But clients see:

👉 “early-stage project”

After this section:

👉 You will look like:

“**serious engineering company ready for scale**”

This is the **most critical section**.

If this works → Cognent grows.

If this fails → nothing else matters.

We are not building “ideas”.

We are building a **daily lead machine**.

📌 SECTION 3: LEAD GENERATION ENGINE (FULL SYSTEM)

🎯 OBJECTIVE

Create a system where:

👉 Every day you generate:

- 15–25 new leads
 - 10–15 conversations
 - 2–5 qualified prospects
-

⚙️ SYSTEM OVERVIEW

You will run **2 engines in parallel**:

Inbound (Authority) + Outbound (Direct reach)

Engine

Purpose

Inbound Build trust & long-term leads

Outbound Immediate leads & revenue

PART 1: INBOUND SYSTEM (AUTHORITY ENGINE)

3.1 🔥 LINKEDIN CONTENT SYSTEM

This is your **primary growth channel**.

Goal

- Build authority
 - Attract founders + CTOs
 - Convert profile visitors → leads
-

Content Strategy (Content-Specific)

3 Content Types ONLY:

1 Engineering Truths (High Authority)

Example:

“Most startups don’t fail at scale. They fail before scale.”

2 Founder Problems (High Engagement)

Example:

“Your product isn’t slow because of traffic. It’s slow because of architecture.”

3 Decision POV (High Trust)

Example:

“We refused this architecture — here’s why.”

Posting Plan

- 1 post daily
 - 5–7 posts/week
-

CTA Strategy

Always end with:

- “What do you think?”
- “Seen this before?”
- “Which one is your issue?”

This drives comments → reach

Tools

- Notion (content planning)
- Taplio / Buffer (optional)

PART 2: LEAD MAGNET SYSTEM

Your Main Magnet

“Scale Readiness Audit”

What it does:

- Attracts high-intent leads
 - Filters serious clients
 - Starts conversation
-

Deliverable:

- System gaps
 - Risk analysis
 - Suggestions
-

Pro Tip

First 10 audits:

Do FREE → build trust

PART 3: OUTBOUND SYSTEM (REAL MONEY MAKER)

3.2 🎯 TARGET LEADS

Focus ONLY on:

- Startups with product
 - Businesses without good website
 - Companies scaling
-

Sources

- LinkedIn
 - Google Maps
 - Wellfound
 - Naukri
 - AngelList
-

Tools

- Apollo
 - Skrapp
 - Google search
 - Manual research (best early stage)
-

3.3 💬 COLD DM SYSTEM (HIGH-CONVERTING)

RULES

- Short

- Personalized
 - Problem-focused
 - No selling
-

DM TEMPLATE 1

Hey [Name],

noticed your product — looks interesting.

Quick question: have you thought about how your system will handle scale?

Saw a couple of potential risks — happy to share if useful.

DM TEMPLATE 2 (STRONGER)

Hey,

I took a quick look at your system — feels like it might face issues when usage grows.

I can share a quick breakdown if you're open.

Goal:

 Start conversation

NOT close deal

3.4 **COLD EMAIL SYSTEM**

Subject Lines:

- “Quick improvement idea”
 - “Your system might break at scale”
-

Email:

Hi [Name],

I came across your product and noticed a few areas that could create scaling issues later.

I've outlined a quick idea — happy to share if helpful.

— Cognent

3.5 **CALL STRATEGY (VERY POWERFUL)**

Approach:

“We built a quick website/system idea for your business...”

This is your BEST strategy.

Why it works:

- Shows effort
 - Builds trust
 - Differentiates instantly
-

3.6 **LEAD QUALIFICATION SYSTEM**

Only focus on:

Criteria	Must Have
Business active	✓
Growth potential	✓
Has budget	Preferable
Has problem	MUST

- Avoid:**
- Students
 - Freelancers
 - No-budget clients

 DAILY EXECUTION SYSTEM

 DAILY TARGET

Task	Target
Leads researched	20
DMs sent	10–15
Emails sent	5
Calls	3–5
Content post	1

 TIME BREAKDOWN

Task	Time
Research	1 hr
Outreach	1–2 hr
Content	30–45 min
Calls	1 hr

 WEEKLY SYSTEM

- Weekly Goals:**
- 100+ leads
 - 50+ DMs
 - 15–20 conversations
 - 5–10 calls
 - 2–3 deals pipeline

 AUTOMATION STACK (LATER STAGE)

Tools:

- Apollo (email)
 - Notion CRM
 - Zapier
 - LinkedIn helper tools
-

FUNNEL DESIGN

Flow:

Content → Profile → Website → Audit → Call → Deal

OR (Outbound):

DM → Conversation → Audit → Call → Close

WHAT MAKES THIS WORK

1. You don't sell immediately

You diagnose first

2. You show insight

Not services

3. You personalize

Not spam

COMMON MISTAKES (AVOID)

Sending generic messages

Talking about services

No follow-up

Targeting wrong audience

IMMEDIATE ACTIONS (TODAY)

Step 1:

Find 20 leads (LinkedIn + Google)

Step 2:

Send 10 DMs

Step 3:

Post 1 LinkedIn insight

Step 4:

Start 3 conversations

FINAL TRUTH

You don't need ads.

Good. Now we move to the **most revenue-critical layer:**

- 👉 This is where **leads become money**
 - 👉 This is where most agencies fail
- You don't lose deals because of skills.
You lose them because of **poor conversion systems**.
-

💰 SECTION 4: SALES & CONVERSION SYSTEM (DEEP EXECUTION)

🎯 OBJECTIVE

Build a system that:

- Converts 20–30% of calls into clients
 - Positions Cognent as **premium (₹2L–₹10L+)**
 - Filters low-quality leads automatically
-

⚙️ COMPLETE PIPELINE

Lead → Qualification → Conversation → Call → Diagnosis → Proposal → Close

4.1 🧠 STAGE 1: LEAD QUALIFICATION (CRITICAL FILTER)

🎯 Goal:

Don't talk to everyone. Talk to **buyers only**.

🔍 Qualification Framework

Ask (before call):

- Do they have a product/business?
 - Are they growing / planning to scale?
 - Do they already face tech issues?
-

● Good Lead

- Startup with traction
 - Business with users
 - Has pain
-

● Bad Lead

- “I have an idea”
 - No budget
 - Wants cheap dev
-

🔧 Execution

👉 Add this question in DM:

“Are you currently running a live product or planning to launch soon?”

4.2 💬 STAGE 2: CONVERSATION (PRE-CALL CONTROL)

🎯 Goal:

Move from DM → Call

✗ Don't do:

- Explain services
 - Send pricing
 - Pitch early
-

☑ Do:

“I can walk you through the risks and improvements in 20 mins — want to jump on a quick call?”

🔥 Psychology:

You're offering **insight**, not selling

4.3 📞 STAGE 3: DISCOVERY CALL (MOST IMPORTANT)

🎯 Goal:

- Identify real problem
 - Increase perceived value
 - Position yourself as expert
-

🧠 CALL STRUCTURE (HIGH-CONVERSION)

1 Context (5 min)

Ask:

- What are you building?
 - Current stage?
 - Any issues faced?
-

2 Problem Deep Dive (10 min)

Ask:

- What breaks when usage increases?
 - Where do you see friction?
 - Any performance issues?
-

3 Insight (10 min) 🔥

This is where you win:

Say:

“Based on what you said, here's what will likely break...”

Explain:

- Risks
 - Bottlenecks
 - Future issues
-

4 Positioning (5 min)

“This is exactly what we solve — we focus on systems that survive scale.”

5 Close to Proposal

“I can map this into a clear plan for you.”

4.4 🧠 STAGE 4: VALUE POSITIONING (KEY DIFFERENCE)

✗ Wrong:

“We build your app”

☑ Correct:

“We help you avoid system failure and expensive rebuilds.”

🔥 Always sell:

- Risk reduction
 - Stability
 - Scalability
 - Growth readiness
-

4.5 📄 STAGE 5: PROPOSAL SYSTEM

🎯 Goal:

Make decision easy

📄 STRUCTURE (USE THIS EXACTLY)

1. Problem

“Your system is at risk due to...”

2. Risk

“At scale, this will lead to...”

3. Solution

“We will redesign and optimize...”

4. Outcome

“Result: stable, scalable system”

5. Pricing

- Clear
 - Tiered if possible
-

🔥 Format:

- PDF or Notion doc
 - Clean, minimal
-

4.6 💰 PRICING STRATEGY (CRITICAL)

Goal:

Position as **premium**

RULES

1. Never price hourly

₹500/hr

₹1.5L for system optimization

2. Use Anchoring

Show:

- Basic: ₹50K
 - Standard: ₹1.5L
 - Premium: ₹4L
-

3. Sell Outcome

“Development cost”

“Scaling-ready system”

4.7 🛡️ TRUST BUILDING SYSTEM

You currently lack:

- Case studies
 - Testimonials
-

Fix (Immediately)

Option 1: Build “Simulated Case Studies”

Example:

“How we would fix a scaling issue in a SaaS product”

Option 2: Demo Work

- Build small prototypes
 - Show before/after
-

Add to proposal:

- Diagrams
 - Architecture
 - Flow
-

4.8 🔄 FOLLOW-UP SYSTEM (MOST IGNORED)

Rule:

80% deals close in follow-up

System:

Day 1:

Send proposal

Day 2:

“Had a chance to review?”

Day 4:

“Happy to clarify anything”

Day 7:

“Should we move forward or pause?”

4.9 ⚡ OBJECTION HANDLING

“Too expensive”

Response:

“Totally fair — but rebuilding later will cost much more.”

“We’ll think”

Response:

“What part are you unsure about?”

“We have devs”

Response:

“We don’t replace teams — we help them build systems that scale.”

4.10 📊 CONVERSION BENCHMARKS

Targets:

Stage	Conversion
DM → Reply	20–30%
Reply → Call	40–60%
Call → Proposal	60–70%
Proposal → Close	20–40%

FINAL SALES PRINCIPLE

You are NOT selling:

- Code

- Apps
 - Features
-

You ARE selling:

👉 **Clarity + Stability + Scale**

⚡ IMMEDIATE ACTIONS (TODAY)

Step 1:

Create call script

Step 2:

Create proposal template

Step 3:

Start 3 calls

Step 4:

Send 1 proposal

🧠 FINAL TRUTH

Most people fail here because:

- They pitch too early
 - They talk too much
 - They don't diagnose
-

👉 You win by:

- Understanding deeply
 - Explaining clearly
 - Positioning strongly
-

Good. This section is where we **sharpen Cognent's edge**.

Most people do competitor analysis to *understand competitors*.

You are doing this to:

👉 **Position Cognent so clearly that clients choose you by default**

🏆 SECTION 5: COMPETITOR ANALYSIS (STRATEGIC DOMINATION)

🎯 OBJECTIVE

- Understand how buyers think
 - Identify why they choose others
 - Redesign Cognent to **win consistently**
-

🧠 MARKET SEGMENTATION

Your competitors fall into **4 categories**:

1. Freelancers
2. Development Agencies
3. AI Startups / Specialists

4. Engineering Consultancies

5.1 COMPETITOR TYPE 1: FREELANCERS

Profile

- Individual developers
 - Cheap pricing
 - Fast execution
-

Strengths

- Low cost (₹10K–₹50K)
 - Quick turnaround
 - Easy communication
-

Weaknesses

- No system thinking
 - No scalability
 - No long-term support
 - Breaks at scale
-

Pricing Model

- Hourly / project-based
 - Low-ticket
-

Why Clients Choose Them

- Budget constraint
 - Early-stage MVP
 - No awareness of risk
-

How Cognent Wins

Positioning:

“Freelancers build features. We build systems that survive growth.”

Strategy:

- Don't compete on price
 - Educate on **future cost of bad decisions**
-

5.2 COMPETITOR TYPE 2: DEVELOPMENT AGENCIES

Profile

- Teams (5–50 people)
 - Offer web/app development
-

Strengths

- Faster delivery

- Structured process
 - UI/UX focus
-

✖ Weaknesses

- Feature-driven (not system-driven)
 - Weak architecture
 - Scale issues later
 - Template-based solutions
-

💰 Pricing

- ₹50K – ₹5L
-

🤔 Why Clients Choose Them

- “Looks professional”
 - Portfolio
 - UI design
-

🔪 How Cognent Wins

Positioning:

“Agencies build what you ask. We design what your system actually needs.”

Strategy:

- Show **architecture thinking**
 - Talk about:
 - failure points
 - scalability risks
-

5.3 🤖 COMPETITOR TYPE 3: AI STARTUPS / SPECIALISTS

🔍 Profile

- Focus only on AI
 - Narrow solutions
-

👉 Strengths

- AI expertise
 - Innovation
 - Trend advantage
-

✖ Weaknesses

- No full system integration
 - AI without infrastructure
 - Fragile deployments
-

💰 Pricing

- ₹1L – ₹10L+

Why Clients Choose Them

- “We want AI”
 - Trend-driven decisions
-

How Cognent Wins

Positioning:

“AI without infrastructure doesn’t scale. We build both.”

Strategy:

- Sell:
 - AI + system
 - Not just AI
-

5.4 COMPETITOR TYPE 4: ENGINEERING CONSULTANCIES

Profile

- High-end firms
 - Enterprise focus
-

Strengths

- Strong architecture
 - Credibility
 - Process
-

Weaknesses

- Expensive
 - Slow
 - Less flexible
-

Pricing

- ₹10L – ₹1Cr+
-

Why Clients Choose Them

- Trust
 - Enterprise needs
 - Scale
-

How Cognent Wins

Positioning:

“Consultancy-level thinking. Startup-level execution speed.”

Strategy:

- Combine:
 - Depth + speed

5.5 🧠 COMPETITIVE POSITIONING MAP

Factor	Freelancers	Agencies	AI Startups	Consultancies	Cognent
Cost	Low	Medium	High	Very High	Medium–High
Speed	High	Medium	Medium	Low	High
Architecture	Low	Low	Medium	High	High
AI	Low	Low	High	Medium	High
Scalability	Low	Low	Medium	High	High

🎯 RESULT

👉 Cognent sits in the **best hybrid position**

5.6 🔥 YOUR DOMINATION STRATEGY

🧠 Core Strategy:

👉 Own the “Scale” category

Instead of competing in:

- “Web development”
 - “AI services”
-

Compete in:

👉 “Scalable Systems”

5.7 🧱 CATEGORY CREATION (VERY POWERFUL)

Define your category:

“Scale-Ready Engineering”

Repeat everywhere:

- Website
 - Content
 - Sales
-

5.8 ⚡ POSITIONING STATEMENTS (USE THESE)

Against Freelancers:

“Cheap code becomes expensive at scale.”

Against Agencies:

“Most agencies optimize for launch. We optimize for growth.”

Against AI startups:

“AI features fail without strong systems.”

Against consultancies:

“We bring enterprise-level thinking without enterprise-level delay.”

5.9 🚨 BIGGEST INSIGHT

Clients don't compare features.

They compare:

👉 **Confidence**

Your job:

Make them feel:

“Cogment understands our system better than anyone else.”

5.10 ⚡ IMMEDIATE ACTIONS

Step 1:

Update messaging:

👉 Focus on “scale”

Step 2:

Create 3 posts:

- “Why agencies fail at scale”
 - “Why freelancers break systems”
 - “Why AI alone isn't enough”
-

Step 3:

Update pitch:

👉 Always compare indirectly

FINAL TRUTH

You don't need to beat competitors.

👉 You need to:

reframe the problem so they become irrelevant

SECTION 6: AUTHORITY & BRAND BUILDING (DEEP EXECUTION)

OBJECTIVE

Build a system where:

- Clients trust you **before talking to you**
 - Your content acts as **pre-sales**
 - You attract **high-quality, high-ticket leads**
-

CORE PRINCIPLE

Authority is built through:

Visible thinking, not hidden capability

6.1 🔥 BRAND STRATEGY (CRITICAL SHIFT)

Current State

- Company exists
 - Content exists
 - But **no strong authority signal**
-

Required State

You need **2-layer authority system**:

Layer 1: Founder Authority (YOU)

- Builds trust fast
 - Drives engagement
 - Human connection
-

Layer 2: Cognent Authority

- Builds credibility
 - Positions company
 - Supports sales
-

Rule:

Founder = Attention

Company = Conversion

6.2 📌 CONTENT STRATEGY (COGNENT-SPECIFIC)

Goal:

- Show expertise
 - Educate market
 - Trigger conversations
-

4 CONTENT PILLARS

1 Engineering Truths (Authority)

“Most startups fail before scale.”

2 System Breakdowns (Expertise)

“Why this architecture fails at scale”

3 Founder POV (Relatable)

“Founders think scaling is a traffic problem...”

4 Decision Content (Trust)

“We refused this project — here’s why”

Posting System

Day	Type
-----	------

Mon	Engineering insight
-----	---------------------

Tue	Founder problem
-----	-----------------

Wed	System breakdown
-----	------------------

Thu	Opinion / POV
-----	---------------

Fri	Case-style
-----	------------

Sat	Light insight
-----	---------------

Sun	Optional
-----	----------

Minimum: 5 posts/week

6.3 🧠 CONTENT STRUCTURE (HIGH PERFORMANCE)

Format:

1. Hook

“Your system is not slow because of traffic.”

2. Insight

“It’s slow because of architecture decisions.”

3. Breakdown

- Issue 1
 - Issue 2
-

4. Close

“Scale exposes weak systems.”

5. CTA

“Seen this before?”

6.4 📄 CASE STUDY SYSTEM (EVEN WITHOUT CLIENTS)

You don’t need clients to build authority

Create “Simulated Case Studies”

Example:

Title:

“How a SaaS product would break at 10K users”

Structure:

1. Problem
 2. Current system
 3. Risk
 4. Fix
 5. Outcome
-
-

Use cases:

- LinkedIn posts
 - Website
 - Sales
-
-

6.5 WEBSITE AUTHORITY LAYER

Add:

1. Case Studies Section

- Real OR simulated
-

2. “How We Think” Section

Explain:

- Architecture approach
 - System thinking
-

3. Insights / Blog

- Weekly posts
-
-

6.6 THOUGHT LEADERSHIP POSITIONING

You should be known for:

“Understanding what breaks at scale”

Repeat these themes:

- Systems > features
 - Scale > speed
 - Architecture > shortcuts
-
-

6.7 CONTENT → LEAD SYSTEM

Funnel:

Post → Profile → Website → Audit → Call → Client

Optimization:

- Profile headline = clear value
 - Website = strong CTA
 - Offer = audit
-

6.8 PERSONAL BRAND EXECUTION

Your LinkedIn:

Headline:

“Helping startups build systems that don’t break at scale”

About:

- What you do
 - Who you help
 - What problem you solve
-

Content:

- Daily insights
 - No fluff
-

6.9 AUTHORITY MULTIPLIER

After 2–3 weeks:

Repurpose content:

- Twitter/X
 - Blogs
 - Website
-

6.10 COMMON MISTAKES

- ✗ Posting motivational content
 - ✗ Talking about tools
 - ✗ Being generic
 - ✗ Inconsistent posting
-

☒ Focus:

- Specific

- Technical
 - Insight-driven
-
-

6.11 AUTHORITY METRICS

Track:

- Profile visits
 - Comments
 - DMs
 - Leads
-
-

6.12 IMMEDIATE ACTIONS (TODAY)

Step 1:

Post 1 strong insight

Step 2:

Update LinkedIn headline

Step 3:

Write 2 more posts

Step 4:

Create 1 simulated case study

FINAL TRUTH

You don't need:

- Ads
 - Big portfolio
-

You need:

- Consistent insights
 - Strong positioning
 - Visible thinking
-

SECTION 7: 3-PHASE GROWTH ROADMAP (0 → 10+ CLIENTS)

OVERVIEW

Phase

Goal

Focus

Phase 1 Get first clients Survival + validation

Phase 2 Build authority Trust + repeatability

Phase	Goal	Focus
Phase 3	Scale system	Growth + leverage

PHASE 1: FOUNDATION (0 → 2 CLIENTS)

OBJECTIVE

- Close first 1–2 paying clients
 - Validate offer
 - Start revenue
-

STRATEGY

Speed > perfection

You don't need:

- Perfect website
- Big portfolio

You need:

 Conversations → Calls → Deals

CORE SYSTEMS TO BUILD

1. Offer System

Create:

 “Scale Readiness Audit”

- Price: Free / ₹2,999
 - Goal: Entry point
-

2. Outreach System

Daily:

- 20 leads
 - 10 DMs
 - 3 calls
-

3. Basic Website Fix

Only fix:

- Hero message
 - CTA
 - One landing page
-

LEAD STRATEGY

Focus:

- Businesses without systems
 - Startups with MVP
-

Approach:

“We built a quick improvement idea for your system...”

SALES FOCUS

Close small deals first:

- ₹10K–₹50K
 - Build trust
 - Get testimonials
-

PHASE 1 TARGETS

Metric Target

Leads 100

Calls 15–20

Clients 1–2

KEY ACTIONS

- Talk to people daily
 - Close imperfect deals
 - Deliver fast
-

PHASE 2: TRACTION (3 → 5 CLIENTS)

OBJECTIVE

- Build authority
 - Create repeatable system
 - Increase pricing
-

STRATEGY

Transition from:

“Trying to get clients”

→

“Clients coming to you”

SYSTEMS TO BUILD

1. ♦ Case Study System

Create:

- 3 case studies
 - Even if simulated
-

2. ♦ Content Engine

Post:

- 5x/week

Focus:

- Scale problems
 - System insights
-

3. ♦ Proposal System

Standardize:

- Template
 - Pricing tiers
-

PRICING SHIFT

Move from:

₹10K–₹50K

to

₹50K–₹2L

LEAD STRATEGY

Combine:

- Inbound (content)
 - Outbound (DMs)
-

PHASE 2 TARGETS

Metric	Target
--------	--------

Clients	3–5
---------	-----

Revenue	₹2L–₹5L
---------	---------

Content reach	Growing
---------------	---------

KEY ACTIONS

- Publish consistently
 - Show expertise
 - Raise prices
-

PHASE 3: SCALE (5 → 10+ CLIENTS)

OBJECTIVE

- Build systems
 - Increase deal size
 - Reduce manual effort
-

STRATEGY

Move from:

“Doing everything”

→
“Running a system”

 SYSTEMS TO BUILD

1. ♦ Team System

- Hire:
- 1 developer
 - 1 support
-

2. ♦ Delivery System

- Create:
- SOPs
 - Processes
-

3. ♦ Lead Automation

- Use:
- Tools (Apollo, CRM)
 - Automated outreach
-

 PRICING SHIFT

Move to:
 ₹2L–₹10L+

 LEAD STRATEGY

- Focus:
- Inbound
 - Referrals
 - Authority
-

 PHASE 3 TARGETS

Metric	Target
Clients	5–10
Revenue	₹10L+
Systemization	High

 KEY ACTIONS

- Delegate
- Automate

- Scale pricing

TRANSITION LOGIC (VERY IMPORTANT)

Phase 1 → Phase 2

Trigger:

- 1–2 clients closed
- Confidence built

Phase 2 → Phase 3

Trigger:

- 3–5 clients
 - Repeating system
-

BIGGEST MISTAKES TO AVOID

- ✗ Waiting for perfect setup
 - ✗ Underpricing too long
 - ✗ Not doing outreach
 - ✗ Ignoring content
-

STRATEGIC INSIGHT

Phase 1 = Hustle

Phase 2 = Positioning

Phase 3 = Systems

IMMEDIATE NEXT ACTIONS

Today:

1. Send 10 DMs
 2. Book 2 calls
 3. Create audit offer
-

This Week:

- Close 1 client
 - Post 5 times
 - Build 1 case study
-

FINAL TRUTH

You don't need 100 clients.

You need:

- 5 good clients
- ₹2L–₹10L deals
- Repeatable system

SECTION 8: 30-STEP EXECUTION PLAN (ACTION SYSTEM)

STRUCTURE

Phase

Focus

Steps 1–10 Foundation (setup + positioning)

Steps 11–20 Growth Engine (leads + sales)

Steps 21–30 Scaling (systems + revenue growth)

PHASE 1: FOUNDATION (STEPS 1–10)

Goal: Look like a **real premium company**

1. Buy Custom Domain

- **Action:** Purchase cognent.tech
- **Outcome:** Trust ↑ instantly
- **Priority:** ● HIGH

2. Connect Domain to Website

- **Action:** Link domain to Vercel
- **Outcome:** Professional presence
- **Priority:** ● HIGH

3. Setup Professional Email

- **Action:** hello@cognent.tech
- **Outcome:** Business credibility
- **Priority:** ● HIGH

4. Rewrite Website Hero

- **Action:**
“Build systems that don’t break at scale”
- **Outcome:** Clear messaging
- **Priority:** ● HIGH

5. Create “Scale Readiness Audit” Offer

- **Action:** Define service + deliverable
- **Outcome:** Lead magnet
- **Priority:** ● HIGH

6. Build Audit Landing Page

- **Action:** Simple page with CTA

- **Outcome:** Conversion system
 - **Priority:** ● HIGH
-

7. Optimize LinkedIn Profile

- **Action:** Update headline + about
 - **Outcome:** Authority ↑
 - **Priority:** ● HIGH
-

8. Define Ideal Client Profile (ICP)

- **Action:** Target startups, scaling businesses
 - **Outcome:** Focused outreach
 - **Priority:** ● HIGH
-

9. Create 1 Case Study (Simulated)

- **Action:** Show system breakdown
 - **Outcome:** Trust signal
 - **Priority:** ● HIGH
-

10. Setup Basic CRM

- **Action:** Use Notion / Sheet
 - **Outcome:** Track leads
 - **Priority:** ● MED
-

⚡ PHASE 2: GROWTH ENGINE (STEPS 11–20)

👉 Goal: Generate leads + close deals

11. Build Daily Lead List

- **Action:** Find 20 leads/day
 - **Outcome:** Pipeline
 - **Priority:** ● HIGH
-

12. Start Cold DM System

- **Action:** Send 10–15 DMs/day
 - **Outcome:** Conversations
 - **Priority:** ● HIGH
-

13. Start Cold Email System

- **Action:** Send 5 emails/day
 - **Outcome:** Additional leads
 - **Priority:** ● MED
-

14. Create DM Templates

- **Action:** Problem-based messages
- **Outcome:** Higher replies
- **Priority:** ● HIGH

15. Post Daily on LinkedIn

- **Action:** 1 post/day
 - **Outcome:** Inbound leads
 - **Priority:** ● HIGH
-

16. Build 2 More Case Studies

- **Action:** Real or simulated
 - **Outcome:** Authority
 - **Priority:** ● HIGH
-

17. Create Call Script

- **Action:** Problem → insight → solution
 - **Outcome:** Better conversion
 - **Priority:** ● HIGH
-

18. Create Proposal Template

- **Action:** Structured doc
 - **Outcome:** Faster closing
 - **Priority:** ● HIGH
-

19. Do 5–10 Calls/Week

- **Action:** Book + attend
 - **Outcome:** Deals
 - **Priority:** ● HIGH
-

20. Close First 2–3 Clients

- **Action:** Offer + follow-up
 - **Outcome:** Revenue
 - **Priority:** ● HIGH
-

PHASE 3: SCALING (STEPS 21–30)

Goal: Increase deal size + systemize

21. Increase Pricing

- **Action:** Move to ₹50K–₹2L+
 - **Outcome:** Higher revenue
 - **Priority:** ● HIGH
-

22. Productize Services

- **Action:** Audit / Build / Partnership
 - **Outcome:** Clarity
 - **Priority:** ● HIGH
-

23. Build Content System

- **Action:** Plan weekly posts
 - **Outcome:** Consistency
 - **Priority:** ● HIGH
-

24. Automate Lead Collection

- **Action:** Use tools (Apollo, scraping)
 - **Outcome:** Scale outreach
 - **Priority:** ● MED
-

25. Create Referral System

- **Action:** Ask clients for referrals
 - **Outcome:** Easy leads
 - **Priority:** ● MED
-

26. Hire First Developer

- **Action:** Freelance/part-time
 - **Outcome:** Delivery capacity
 - **Priority:** ● LOW
-

27. Build SOPs (Processes)

- **Action:** Document workflows
 - **Outcome:** Consistency
 - **Priority:** ● MED
-

28. Improve Delivery System

- **Action:** Structured execution
 - **Outcome:** Better results
 - **Priority:** ● HIGH
-

29. Build Brand Assets

- **Action:** Portfolio, visuals
 - **Outcome:** Authority
 - **Priority:** ● MED
-

30. Scale to ₹2L–₹10L Deals

- **Action:** Focus on high-value clients
 - **Outcome:** Growth
 - **Priority:** ● HIGH
-

EXECUTION TIMELINE

Week 1:

- Domain + website fix
- Audit offer
- Start outreach

Week 2:

- First calls
 - First deal
-

Week 3–4:

- 2–3 clients
 - Content consistency
-

Month 2:

- Raise pricing
 - Build authority
-

EXECUTION RULES

Rule 1:

 Outreach daily (non-negotiable)

Rule 2:

 Content daily (authority)

Rule 3:

 Calls weekly (revenue)

BIGGEST FAILURE POINT

Most people:

- Plan too much
 - Execute too little
-

You must:

 Execute this DAILY

FINAL TRUTH

This 30-step plan = **your growth engine**

If you:

- Follow consistently
- Improve weekly

 You WILL get clients
